

Enhanced Security Deposit Program

HELPING YOUR BUSINESS BE MORE COMPETITIVE

TVA helps Tennessee Valley businesses operate more efficiently and cost-effectively by offering various rate options and credits for qualifying customers.

The Enhanced Security Deposit Program is available to commercial and industrial electric customers through a partnership between TVA and participating distributors of TVA power. The program allows for the waiver or refund of the electric utility security deposit to qualifying customers. The process is simple, quick, and free.

How it works:

- The program is open to creditworthy commercial and industrial customers with an average monthly billing of more than 50 kilowatts.
- Local electric power company representatives work with business customers to prepare the credit application, which is sent to a third-party underwriter for review.
- When the application is approved, the power distributor will waive or refund the security deposit.

Call your local power company for more information about the Enhanced Security Deposit Program—another value-add service of the public power companies of the Tennessee Valley.
